

Puzzle 11. Double Crossed – Page 1

We have discovered double agents in our organization. They are cunning and devious, and we only know them by their code names. Their handlers are not quite as smart and after intercepting their communications, we can now follow them and find the spies. They have a meeting planned at the entrance to the College of Education (William J. Raggio Building) West entrance. Let's show up and catch them so we can find out their secrets.
